## City of Ontario Capital Improvement Program (CIP) Fiscal Year 2009-10

---

The City of Ontario develops its Five-Year Capital Improvement Program (CIP) consistent with the goals and objectives established by the City Council. The adopted Five-Year Plan is subject to change during the budget year to reflect fluctuations in City needs and priorities. Projects are included in the CIP based on an assessment of needs and available funding. Projects with limitations on the use of funds are considered on an individual basis, while those without such funding limitations are considered relative to the overall needs of the City. The CIP is used as a planning tool by the City to: (1) identify capital improvement needs and (2) coordinate the financing and timing of those needs in a manner that assures the most responsible and efficient use of the City's limited resources.

The Five-Year CIP is reviewed annually to allow the City Council the opportunity to reassess projects in the program. The current year of the CIP is the funded portion and is referred to as the **Capital Budget**. This consists of the planned expenditures for the fiscal year for adopted projects. Projects and expenditures identified in future fiscal years are approved on a planning basis only and do not receive expenditure authority until they are included in the Adopted Capital Budget for the subject fiscal year. Review of the overall program by the Public, City Council, and Planning Commission is desirable for effective implementation of the City's *Mission Statement* as well as the City Council's more immediate *Goals and Objectives*.

As presented in the Adopted Operating Budget for Fiscal Year 2009-10, the CIP totals **\$105,741,361** for all categories of capital improvement projects reported by the various City departments. The amount of the adopted projects, **\$105,741,361**, reflects a 105.1% increase over the previous fiscal year's Capital Budget of **\$51,560,818**. The increase (difference between the two years) is primarily attributed to the renovation of City Hall and the North Milliken Avenue Grade Separation projects.

Where applicable, the annual operating cost for each capital project has been incorporated into each project, representing the preliminary estimate for operating and maintenance (O&M) costs that will be incurred during the five-year period as provided. The cost estimates are determined by the department responsible for project completion. Actual O&M costs to be budgeted in future years may vary from these initial estimates. Annual operating and maintenance costs for the Fiscal Year 2009-10 CIP are already factored into the Adopted Fiscal Year 2009-10 Operating Budget. The following components are included in the calculation of annual operating and maintenance costs:

- Operating – The operating costs directly associated with the project/facility upon completion.
- Maintenance – The funding required to maintain the project/facility upon completion.
- Cost Offset – Revenues associated with the project/facility or cost reductions due to increased operating efficiencies upon completion.

The following projects were proposed by various agencies, but are not included in the adopted Five-Year Capital Improvement Program due to the unavailability of funding:

<b>Project Name</b>	<b>Project Cost</b>
Fire Training Center Expansion	\$ 2,214,240
Relocation of Fire Administration Offices	\$ 5,586,500
Renovation of Fire Station No. 2	\$ 745,000

As appropriate, additional funding sources are identified, staff will include these projects in future Capital Improvement Program(s) for the Mayor and City Council's consideration.

## Total Sources of Capital Improvement Program Funds \$105,741,361

## Total Uses of Capital Improvement Program Funds \$105,741,361

## Total Capital Improvement Program Summary

The Capital Budget is summarized by project category and fund below:

Fund/Description	Project Category								
	Parks	Public Facilities	Sewer	Storm Drains	Streets	Traffic	Water	Miscellaneous	Total
002 Quiet Home Program	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
