

# Water Use Efficiency

## Why Conserve Water?

Conserving water reduces global warming, conserves our natural resources, and reduces our susceptibility to water shortage during times of drought.

- When you use water wisely, you **help the environment**. You help preserve drinking water supplies and ease the burden on wastewater treatment plants.
- When you use water wisely, you **save energy**. You save the energy that your water supplier uses to pump and treat water.
- When you use water wisely, you **save money**. If you use less water, you'll have more money left to spend on other things.

### CITY OFFICIALS

**Paul S. Leon**  
Mayor

**Chris Hughes**  
City Manager

**Debra Dorst-Porada**  
Mayor pro Tem

**Mohamed El-Amamy**  
Utilities General manager

**Alan D. Wapner**  
**Sheila Mautz**  
**Jim. W. Bowman**  
Council Members

## Water Conservation Tips

- Use a broom instead of a hose to clean sidewalks, driveways, and other paved surfaces.
- Wash your car using a hose equipped with a shutoff nozzle, or at a commercial car wash which recycles water.
- Use decorative fountains which recycle water.
- Encourage restaurants to serve water only to those who request it.
- Promptly repair plumbing leaks.

Water landscape no more than every other day and during the hours of 6:00 a.m. and 6:00 p.m.

Adjust sprinklers to avoid runoff onto sidewalks and streets.
