PROCEDURE FOR DEMOLISHING INGROUND SWIMMING POOL

(This is for leaving the swimming pool in ground in lieu of complete removal.)

1. Obtain a swimming pool demolition permit. A dimensioned plot plan clearly showing the location of the pool is required.
2. Break up the concrete at the bottom of the pool at its deep end.
3. Remove electric supply to equipment or wire nut conductors and seal in weatherproof junction box. Remove or cap off any gas line.
4. Call 909-395-2361 for inspection to verify the completion of steps 2 and 3.
5. Back fill the swimming pool.
6. Call for final inspection at 909-395-2361.

Note: Unless the backfill material is properly compacted and is certified by a licensed soils engineer in a compaction report that the fill is compacted to 90% of maximum density, the uncertified fill within the pool shell shall not be used to support any future building or structure.
